

The 2007 AR Velocity is the most revolutionary bow design to hit the archery market. With years of engineering and product development from top to bottom, this bow will change the way the world thinks about compound bows. Its compact geometry is like no other with huge benefits

to the archer. The Velocity delivers blistering arrow speed, phenomenal accuracy and is incredibly light in weight. The AR 35 is fast, ultra smooth and virtually vibration free. The AR 35 is the standard by which other bows are measured.
