AURORA BASIC CASE

Extremely compact and lightweight the new Aurora Basic case offers a very good protection for the compound bows. Available both in Realtree as well as in target color.

DRAW LENGTH MODULES

Thanks to the optional draw length modules the Discovery bow can be converted in a standard compound bow with a draw length adjustable from 18 to 28 inches.

Discovery is the real universal compound bow. Thanks to its cam without let off and without fixed draw length it can be used with a draw length between 14" and 30" by maintaining the same poundage.
