

KATERA

Introducing the all-new Hoyt Katera™. A super-charged, fast and furious machine that's turning heads and making believers out of diehard bowhunters everywhere. Our 2008 premiere bow is a light, sleek, smooth-drawing, great-looking, high-octane speed demon that boasts a blazing 330 fps – making it the fastest bow we've ever sent to market. But unlike other speed bows, Katera remains exceptionally forgiving and easy to shoot due to our exclusive StealthShot Technology. Powered by our dynamic new Z3 Cam & 1/2 Performance System, an engineering marvel in its own right, the Katera maintains much higher speeds at shorter draw lengths than the competition. It also comes with a go-the-distance guarantee, so you'll never have to worry about it performing in even the most grueling conditions. The Hoyt Katera: finally, a bow that hunts as hard as you do.

330 FPS
