

STEALTHSHOT STRING DAMPENING DEVICE
 Most of the 2007 Hoyt bows are equipped with the new StealthShot String Suppression System. Hoyt's new, innovative StealthShot String Suppression System may well be the most effective noise and vibration dampening device ever engineered into a bow. As the bow is shot and the string reaches brace height, the StealthShot momentarily captures and

suppresses the string nearly eliminating all movements and oscillation after the shot. Tests have demonstrated that bows equipped with the Hoyt new StealthShot reduce string oscillation and movements by over 70% and create a much cleaner release of the arrow from the string.

Some models of the 2007 Hoyt line can be equipped, on special request, with the new Vector and C2 cams. In order to check the availability of the various models with the new cams, please contact your authorized dealer.

38 ULTRA

- 38"
- 2.010 g
- IBO 300 FPS
- 7 1/2"
- Riptide **RI**, Black **BK**, Red **RD**, Blue **BL**, Inferno **IN**.

Code 554131

CAM & 1/2

Let Off 65%

- 26 24.5" -> 27" 60#
- 27 25.5" -> 28" 60#
- 28 26.5" -> 29" 60#
- 29 27.5" -> 30" 60#
- 30 28.5" -> 31" 60#

RIZER SHOXS

In the 2007 bows one or two RizerShox are used and thanks to the optimized placement of the same in the riser they are able to effectively reduce any excess noise and vibration.

HOYT TEC CABLE GUARD BAR

Hoyt Tec bows are provided with a fixed carbon cable guard bar. The adjustable cable guard bars are available as accessories.

LET OFF MODULES

The let off of all Hoyt compound bows provided with cam & 1/2 is 65% for Target bows and 75% for Hunting bows. The let off can be varied using the optional modules.
