

Mathews has created a new brand that is intended to cover the middle price point. Mission Archery bows offers features usually common only to high end bows at an intermediate

price. The riser is, for all models, made out of a piece of machined aluminum and the same is more or less machined based on the different models.

### MISSION X5

25" -> 30" 50/60/70#

#### ZEBRA STRINGS

A precision blend of Vectran and HMPE. Two bundles of strands are rotated clockwise and counter clockwise to create the best balanced bowstring on the market that will make your peep sight rotate as you draw your bow.

#### AURORA BOWPACK

This practical medium-sized backpack, besides a practical transportation system for compound bows, includes several pockets and compartments. This backpack is also equipped with a rain cover system.
